Stonecarpet®

A decorative, commercial, interior floor system

DESIGN

STATE OF THE ART TECHNOLOGY

GRAPHICS

DISTINCTIVE • UNIQUE

Logos and other graphics are computer generated and can be duplicated in exact detail regardless of difficulty. With **Stonecarpet®** you can actually put artwork into your floor and get as creative as your imagination takes you.

A decorative, commercial, interior flooring system which creates a distinctive & unique look unlike any other floor.

It is an "open" system which creates this look and brings many benefits such as:

- Virtually unlimited design capabilities
- Customized colors for the project
- Acoustics unlike any other hard surface product
- No puddling from spills, melted snow, etc.
- Safe... slip-resistant
- Highly resistant to chemicals & stains
- Ease of Maintenance
- Installation by trained craftsmen
- ADA Compliant

MINING/COLORS

SPECIALY SELECTED STONES
HIGHEST QUALITY PIGMENTS

Colors are blended to create a "custom" color on practically every project. Special colorations can be created with the assistance of your representative. **Stonecarpet®** is composed of 3-4 millimeter sized individual quartz stones, mined from what were once nature's river beds. These stones are screened many times for size, shape and quality, then washed and processed to meet our requirements. Then they are colored with the highest quality pigments in a computer-controlled process and monitored to assure constant color reliability.

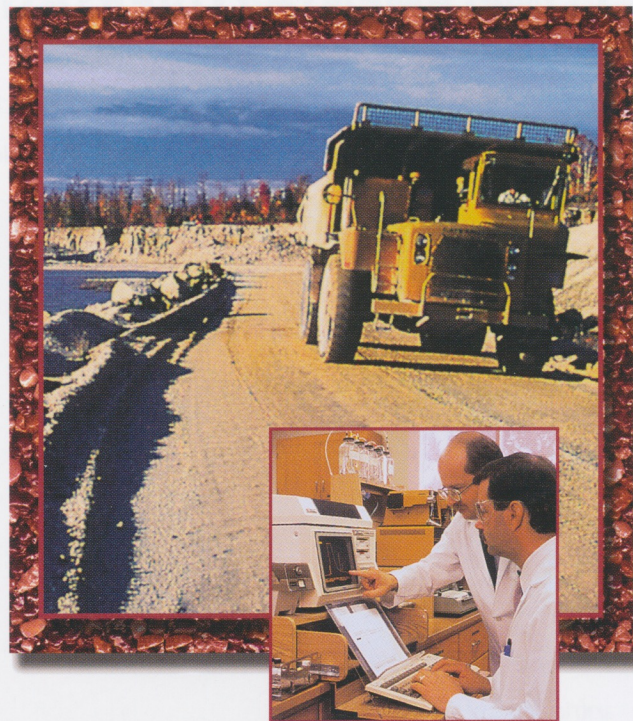

Manufactured with specifications to achieve the highest quality product technologically available...not one, two, or three screenings of quartz stones, but actually eight different screens are used during the process of eliminating

undesirable stones in order to obtain optimum size, shape and quality. The results are magnified in a finish of luster and beauty most pleasing to the eye.

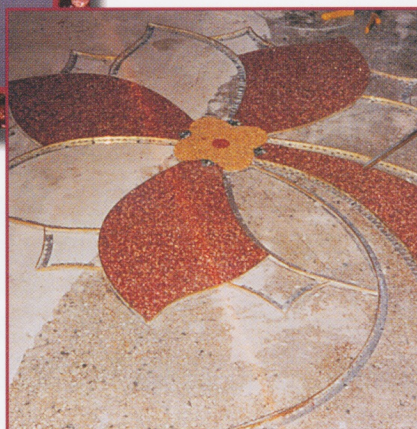

CONSTRUCTION

NEW CONSTRUCTION OR REMODEL

Stonecarpet® can be installed in most cases, over any existing floor without the high cost of necessarily having to remove the old floor. This can easily be determined by your dealer.

**AN ELEGANT
SOLUTION FOR A
PROBLEM FLOOR**

CERTIFIED INSTALLATION

TRAINED PROFESSIONAL MECHANICS

The key to all the benefits of **Stonecarpet®** is the very installation. The manufacturer, Specifier Products, does not make the product available to any dealers without the proper training, support, and certification of qualified and experienced installers.

Any company offering the **Stonecarpet®** flooring system has been screened and certified by the manufacturers before it can market the product. Our technical department stands ready with problem-solving capabilities and consultation involving every aspect of the **Stonecarpet** system.

PROFESSIONAL CONSULTATION

CARE AND EXPERTISE IN CUSTOMER SERVICE

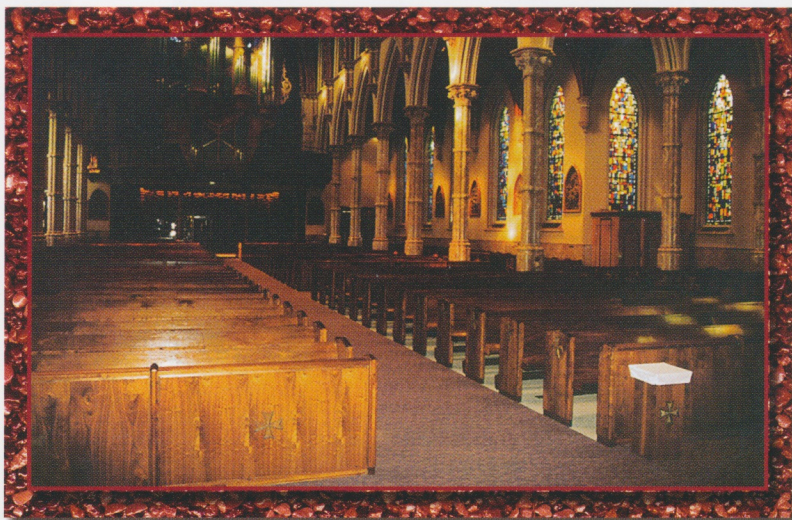

High quality pigments, precisely selected sizing, environmentally sound purification processes, manufacturers' certification, and qualified installation will ensure the success of your flooring investment. **Stonecarpet®** stands by its customers through every step, from the beginning blueprints to the final handshake.

MONOLITHIC

SEAMLESS • SLIP-RESISTANT

Researched, developed and presented by Specifier Products Inc., this natural flooring treatment is a seamless, slip-resistant flooring composed of natural quartz stones. Never will you have to look at unsightly grout lines! Unlike any other flooring, this unique architectural surface "hides" soil while retaining its attractiveness.

EASE OF MAINTENANCE

COST EFFECTIVE • SIMPLE

Stonecarpet® provides an impressive advantage on after-care maintenance costs. Routine maintenance is accomplished by simple dry vacuuming. Easy overall cleaning by hot water extraction is recommended and programmed maintenance is based on conditions and requirements. After cleaning, the flooring is immediately accessible to traffic. A full line of maintenance products are available. No unnecessary drying

time; fully restored to its previous appearance. **Stonecarpet** is the obvious choice for retail stores, auto showrooms, health-care facilities, museums, art galleries, churches, offices and public areas.

**FLEXIBILITY OF
DESIGN FOR
ARCHITECTS
AND INTERIOR
DESIGNERS**

COMPLEMENTARY/VERSATILE

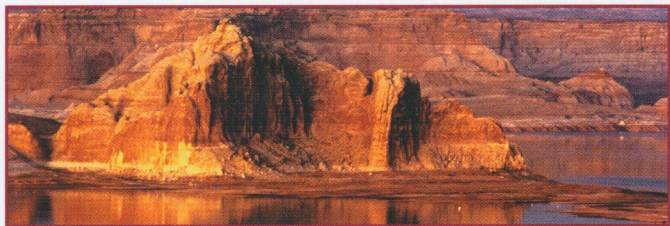

NATURAL • CASUAL • ELEGANT

Through color and design, **Stonecarpet®** can achieve a look which lends itself in a natural way to complement products in a showroom environment rather than distract from them. Accepted as a standard flooring treatment in Europe for over 30 years, **Stonecarpet** is no newcomer to the international flooring industry. Numerous tests conclude that the beauty of this natural product is second only to its ability to retain its appearance level, reduce maintenance costs and resist staining on an everyday basis. Competitively priced with a variety of conventional flooring treatments, **Stonecarpet** introduces a sense of intrigue with its unexpected acoustics and "soft" walk; a noticeable departure from traditional flooring.

YOUR FASHION-ORIENTED CHOICE OF THE FUTURE

SPI's team of service-oriented, client driven distributors and installers will insure your complete satisfaction through carefully designed, well-executed and timely installation.

TESTS

Federal Flammability Standard - (DOC FF 1-70) - Passes

Flooring Radiant Panel Test - (ASTM E 684) - Class 1

Smoke Density Test - (ASTM E 662) - 450 or Less

Slip-Resistance Test - (ASTM C 1022-39)

SPECS

Element Size - 3-4mm. quartz granules

Layer Thickness - approximately 5/16"

Weight - 3 lbs. per sq. ft.

Surface Structure - level, open and slip-resistant
